Notice of Application for Approval of Discontinuance or Modification of a Railroad Signal System

Under part 235 of title 49 of the Code of Federal Regulations (CFR) and 49 U.S.C. 20502(a), this document provides the public notice that by a document dated November 20, 2019, CSX Transportation (CSXT) petitioned the Federal Railroad Administration (FRA) seeking approval to discontinue or modify a signal system. FRA assigned the petition Docket Number FRA-2019-0100.

Applicant: CSX Transportation

Mr. Carl A. Walker

Chief Engineer Communications & Signals

500 Water Street

Speed Code J-350

Jacksonville, FL 32202

Specifically, CSXT requests approval to modify the Edgeton automatic railroad crossing-at-grade, at milepost S-154.73, Aberdeen Subdivision, Raleigh, NC. The modification will consist of the removal of existing relay logic interlocking and the installation of microprocessor-based equipment to control the interlocking with the

removal of the numbers 1 and 3 power-operated split point derails.

CSXT explains the installation of microprocessor interlocking control and upgrades to track circuits and wayside devices and the retirement of split point derails will allow for safer operational movements through the interlocking.
